Lake Santee Regional Waste & Water District Newsletter *January 2016*

Carbon Replacement Is Complete!

Just before Christmas, the Water & Wastewater District installed approximately 10,000 pounds of new carbon into the GAC tanks, replacing the bad carbon that had been causing so much frustration. The new carbon is operating superbly with all test results within normal limits. Turbidity is low and manganese levels are low. Water samples were sent off to an independent lab and the test results on the HAA5 and TTHM were very good - all in compliance. The District is very happy with the performance of the new carbon and wishes to thank both Water Solutions Unlimited and Jacobi Carbons for their assistance with this.

Newsworthy

Ed Fox Says Good-Bye

Please help us in thanking Ed Fox for his many years of service to the District. Ed spent 4 years on the Board, including being an Officer. Best Wishes to Ed (and Mary) in their next adventure.

Calendar

The Board meets at 3:30 p.m. on the 3rd Thursday of each month in the Community Room.

Next meeting is: February 18th.

See you there.
